

**Chemistry 5995(083)-8990(013)**

**Metals in Medicine**

**Assignment 3**

**Due: February 14, 2019**

You are assigned to read three articles for the second seminar presentation discourse that focus on the nontoxic aspects of chromium. One article will focus on the debate about whether it is essential and the other two focus on its antidiabetic role (see attached). Bring to class your list of one talking point or question per article that can serve as a discussion topic in class. Personally, I prefer that you email me your list by 8 am to try to minimize printing.
